

FIELDERS STEEL ROOFING
Flexibility is our Strength™

Centenary Hip Roof

Residential Profiles

Centenary Hip Roof

The Hip Roof product combines the elegance of high gloss pre painted steel and the traditional design of carports, patios or verandahs.

The unique Fielders Centenary Hip Roof is available as an attached or freestanding unit and comes in all the popular roof pitches of 15, 20, 25 and 30 degrees. Like the other products in the Centenary range, the Hip Roof uses both 108mm and 158mm portals, enabling spans beyond 10 metres. Previously only ever attempted in timber, the unique design of the Centenary beam allows Fielders to bring you the first pre-engineered all coloured steel Hip Roof Carport.

- Available in attached or freestanding designs.
- High tensile coloured steel posts and beams that can span further, giving design flexibility.
- Beam and posts come with a high gloss finish, ensuring low maintenance and a stylish appearance.
- Pre-engineered for ease in council approval.
- Engineered up to a height of 4 metres.
- Flexible option for Hip one end and Gable the other.
